▀ SERVICE LINE EXPERTISE

Transactional Services

Mergers & Acquisition Solution

Consolidating of companies or assets through various types of financial transactions, including mergers, acquisitions, consolidations, private placement, purchase of assets and management acquisitions. We support Client's efforts through every stage of the transaction lifecycle: identifying companies to invest, due diligence, alliance, post-merger to exit support.

Structuring Solution

Managing the flow of the transaction that fits with the Clients purposes and maintaining the direct impact of it.

Share Valuation

Creating stock or share valuation to indicate Client's value in the case of transactional action. K-advisory is licensed to conducts share valuation to public and private companies.

Selling/Separate & Buying/Integrate

Assisting and advising Clients through our strategic portfolio management to improve Client's value and to help on monetize decisions, across the entire life cycle.

Corporate Finance

Pre IPO

Providing advisory to enhance the profile and credibility of Client's business as well as adequately prepare in advance of an IPO to ensure a successful outcome.

Financing Solution

Linking the financier and the business owner with the best scheme and giving a value added to the beneficiary.

Investment Analysis

Capturing opportunity by calculating an investment for its profitability to its risk and evaluate the investment fittings to Client's target and portfolio.

Capital Budgeting

Strategic Planning

Generating feasible and sustainable financial story and financial structure which will be emended into a strategic implementation. Beginning with idea generation, validating that it is in line with company's vision, the goal is set. We then start preliminary study to analyze Client's idea and compliment it with industry condition.

Budget Development

Assisting Client to developing a good financial planning and budgeting that enables allocating, tracking and monitoring of fiscal spending to help control spending, forecast cash flow and profit.

Business Process Solution

Improving the way Client's resource works by maximizing the key asset that enables employees, resources, and technology come together to produce better value for Client's business. Taking a critical look at how functions either contribute or detract from short- and long-term goals.

Assisting Clients to unlock profitability by driving revenue growth and improving operational effectiveness. Working with different departments to increase earnings, optimize operations, cut cost and increase efficiency

Management Exposure

Feasibility Study

Helping Clients identify problems and opportunities, determine objectives, describe situations, define successful outcomes and assess range of cost and benefit associated with alternatives for problem solving. Resulting recommendation and setting limitation to establish viable business concept.

Strategic Plan

Creating business plan that provides a tactical roadmap for Client to reach the company's growth goals. Starting with reviewing and auditing business ideas, conducting opportunity analysis and internal/external research, K-advisory will create strategic recommendation on business model, marketing and operation strategies and financial growth strategies
